* (Description)	7	32	2		
* (Description)	<p>The Introduction to Corpus Linguistics is an optional course for seniors in English Major. The course is designed to have 32 class hours with 2 credits. The major objective for this course is to offer students some basic theoretical knowledge in the field of corpus linguistics and let them have a command of the corpus methods, such as compiling corpus, using concordancing software, conducting corpus-based or corpus-driven analysis, and applying corpus methods to foreign language learning. This course not only provide students with theoretical and methodological supports in their undergraduate thesis design, but also foster their interest in linguistics, which is of significance in training talents for the field of linguistics.</p> <p>The main feature of this course is the combination of theory and practice. Participants in the course are required to have some basic skill in language analysis, the manipulative ability, and the basic knowledge of statistics and computer language. In the teaching syllabus, in spite of the introduction to some basic theories of corpus linguistics, including its development, corpus design and development, research topics such as collocation, colligation, etc. the majority of course syllabus is designed for students' operation and practice. And students will also have a chance to conduct some preliminary academic studies based on corpus.</p>
