Course Information					
Course Code	EC109	* Credit Hours	64	* Credits	4
* Course Name	Principles of Economics				
(Course Type)	Compulsory				
Audience	Freshmen				
(Language of Instruction)	Chinese/English				
* School	Antai College of Economics & Management				
Prerequisite	None				
Instructor	Huang Cheng Shi Fei	Course Webpage	jingjixyl@163.com		
* Description	<p>300-500</p> <p>The course is compulsory, fundamental and basic course of undergraduates in economics and management majors. As an introductory course, it stresses on the applications and policy analyses of principles of economics instead of formal models of economics. The content of the course is mainly through relatively vivid cases to illustrate how to apply the basic principles of economics to practical economic problems which makes students understand economics in life.</p> <p>The course classified into (1) Microeconomics, which includes 7parts: Introduction; How markets work; Markets and welfare; The economics of the public sector; Firm behavior and the organization of industry; The economics of labor market and Topics for further study; (2) Macroeconomics, which includes: The data of macroeconomics; The real economy in the long run; Money and prices in the long run; The macroeconomics of open economies; Short-run economic fluctuations and Final thoughts.</p>				
* Description	<p>This course covers fundamental tools and applications of concepts in microeconomics and macroeconomics, esp. 10 basic principles of economics. The section on microeconomics focuses on markets as a mechanism for allocating scarce resources. Using tools of welfare economics, it addresses</p>				

market efficiency, outcomes from market failures and firms with market influence. The section on macroeconomics provides a mix of classical and Keynesian ideas, addressing the forces that shape the economy in both the short run and the long run. Topics include the theory of economic growth, the role of financial markets, fiscal and monetary policies and the international economy.

Course Syllabus

* (Learning Outcomes)

As an introductory course, when students have finished it they:

1. Should master the basic concepts, basic framework and analytical logic of modern economics.
2. Are able to observe, analyze and illustrate simple and typical economic phenomena as well as problems in realistic life with applications of principles of economics.
3. Have well prepared knowledge and capability for further study of intermediary and advanced economics in the future.

* (Class Schedule & Requirements)	Content	Sessions	Method / Pedagogy	Assignment and requirement	Basic requirement	test
	Chap. 1 Ten Principles of Economics	3	Lecture			
	Chap.2 Thinking like an Economist	1	Lecture			
	Chap.3 Interdependence and the Gains from Trade	1	Lecture		Case study	
	Chap.4 The Market Forces of Supply and Demand	3	Lecture		Case study
